### Research Interests

Languages and compilers for Embedded Systems. Computer-Aided Digital Design.

### Experience

Columbia University, New York Associate professor, Department of Computer Science; Tenure awarded June, 2008	2006–present
Columbia University, New York Assistant professor, Department of Computer Science	2001–2006
Google X, Mountain View, California Visiting Professor. Host: Satnam Singh.	June, July 2018
École Normale Supérieure, Paris, France Invited Professor, Computer Science Department. Host: Marc Pouzet	June, July 2012
Microsoft Research, Cambridge, UK Visiting Researcher. Host: Satnam Singh.	July, August 2010
Synopsys, Mountain View, California Senior R&D Engineer	1998–2001
Simplex Solutions, Sunnyvale, California Senior Member of Technical Staff.	1997–1998
Interval Research Corporation, Palo Alto, California Researcher.	Summer 1993
Vitesse Semiconductor, Camarillo, California VLSI Design Engineer.	Summer 1991
Microsoft, Redmond, Washington Hardware Design Engineer.	Summer 1990

### Education

University of California, Berkeley Ph.D in Electrical Engineering Edward A. Lee, advisor Thesis: <i>The Specification and Execution of Heterogeneous Synchronous Reactive Systems.</i>	1994–1997
University of California, Berkeley M.S. in Electrical Engineering. A. Richard Newton, advisor Thesis: <i>An Esterel Compiler for a Synchronous/Reactive Development System.</i>	1992–1994
California Institute of Technology B.S. with Honors, Electrical Engineering	1988–1992

### Honors and Awards

ESWEEK/CASES Test-of-Time Award For our 2008 CASES paper “Predictable Programming on a Precision Timed Architecture” Given to one paper per year with highest impact published at a previous conference	July 2023
Best paper award Design Automation and Test in Europe Munich, Germany (given to 2 of 800+ submissions)	March 2006
Senior Member IEEE (Institute of Electrical and Electronics Engineers) This is the main professional organization for Electrical Engineers	2006
National Science Foundation Faculty Early Career Development (“CAREER”) Award “Designing Embedded Systems with Domain-Specific Languages” I won this award the first time I applied.	2002
NSF Graduate Research Fellowship Three years tuition & stipend, awarded annually to about 800 of 5000 applicants.	1994–1996
California Fellowship in Microelectronics One year tuition plus stipend.	1992–1993
Caltech Merit Award One year full tuition, awarded annually to about 45 of 800 undergraduates.	1990–1991, 1991–1992

### Research Support

DARPA HR0011-19-C-0106: \$6.4M (my share \$517k) <i>Secure Handling of Isolated Executables without Leaking Data (SHIELD)</i> with Perspecta Labs.	2019–2024
NIH 1RF1MH120034-01: \$500k total (my share \$260k) <i>Generating a Formal Set of Collaborative Standards for Sharing Behavioral Data and Task Designs to Enable Reproducibility in Neuroscience</i> with Adam Kepecs of Washington University.	2020–2022
NSF CCF-SHF 1162124: \$1.2M total (my share \$600k) <i>SHF:Medium:Compiling Parallel Algorithms to Memory Systems</i> with Martha A. Kim.	2012–2016
NSF CCF-SHF 1065338: \$625k total (my share \$208k) <i>SHF:Medium:Type-Specific Instruction Processing</i> with Martha A. Kim and Ken Ross.	2011–2014
NSF CSR-EHS 0720292: \$1.2M total (my share \$200k) <i>CSR-EHS:PRET: Precision Timed Architectures</i> with Edward A. Lee et al.	2007–2010
NSF CSR-EHS 0614799: \$240k <i>CSR-EHS:SHIM: Developing Embedded Systems with Deterministic Concurrency</i>	2006–2008
Gift from Altera, \$20k <i>Hardware Software Co-Synthesis from SHIM,</i>	2006

Joint Semiconductor Research Corporation/Microelectronic Design Center, \$300k <i>High-Level Synthesis from the Synchronous Language Esterel</i>	2003–2006
New York State, NYSTAR program, matching funds, \$11k	2002
Hardware grant from Intel, \$13k	2002
Gift from Intel: \$25k <i>High-level Synthesis from the Synchronous Language Esterel</i>	2002
NSF Faculty Early Career Development (CAREER) Award 0133348: \$300k <i>CAREER: Designing Embedded Systems with Domain-Specific Languages</i>	2002–2007

### Released Software

The Columbia Esterel Compiler (2003–)

- Only open-source compiler for the Esterel language.
- Generates the most efficient C code for Esterel of any known compiler, including the commercial implementation.
- Used at Freescale semiconductor, NASA, University of Kiel, and University of Auckland. Cited in about 15 papers.
- The CEC-Users mailing list has 32 subscribers from companies including Motorola, TI, Esterel Technologies, Philips, Intel, IBM, and Xilinx
- <http://www1.cs.columbia.edu/~sedwards/cec/>

The EstBench Esterel benchmark suite (2004)

- Only public benchmark suite for the Esterel language
- Cited in about ten papers
- <http://www1.cs.columbia.edu/~sedwards/software.html>

The Ext C-code documentation extraction system (1997)

- Used in the widely-distributed VIS and CUDD software packages (at University of Colorado, Boulder). Cited in a few papers.
- <http://www1.cs.columbia.edu/~sedwards/ext/>

# Publications

My ORCID: 0000-0003-2609-4861

## Patent

US Patent 7,100,164. “Method & Apparatus for Converting a Concurrent Control Flow Graph into a Sequential Control Flow Graph.” Filed January 6th, 2000, issued August 29th, 2006.

## Books

- [1] Dumitru Potop-Butucaru, Stephen A. Edwards, and Gérard Berry. *Compiling Esterel*. Springer, January 2007.
- [2] Stephen A. Edwards. *Languages for Digital Embedded Systems*. Kluwer, Boston, Massachusetts, September 2000.

## Chapters in Books

- [3] Stephen A. Edwards. Further experiences teaching an FPGA-based embedded systems class. In Roger Chamberlain, Walid Taha, and Martin Törngren, editors, *Cyber Physical Systems. Model-Based Design*, number 11615 in Lecture Notes in Computer Science, pages 222–230. Springer, May 2019.
- [4] Stephen A. Edwards. [On determinism](#). In Patricia Derler, Marten Lohstroh, and Marjan Sirjani, editors, *Principles of Modeling: Essays dedicated to Edward A. Lee on the Occasion of his 60th Birthday*, volume 10760 of *Lecture Notes in Computer Science*, pages 240–253. Springer, Berkeley, California, October 2017.
- [5] Stephen A. Edwards and Joseph T. Buck. System-level specification and modeling languages. In Luciano Lavagno, Igor L. Markov, Grant Martin, and Louis K. Scheffer, editors, *Electronic Design Automation for IC System Design, Verification, and Testing*, chapter 4, pages 59–74. CRC Press, December 2016.
- [6] Stephen A. Edwards and Joseph T. Buck. Design and verification languages. In Luciano Lavagno, Igor L. Markov, Grant Martin, and Louis K. Scheffer, editors, *Electronic Design Automation for IC System Design, Verification, and Testing*, chapter 15, pages 373–400. CRC Press, December 2016.
- [7] Stephen A. Edwards and Nalini Vasudevan. [Compiling SHIM](#). In Sandeep K. Shukla and Jean-Pierre Talpin, editors, *Synthesis of Embedded Software: Frameworks and Methodologies for Correctness by Construction*, chapter 4, pages 121–146. Springer, January 2010.
- [8] Stephen A. Edwards. Design and verification languages. In Luciano Lavagno, Grant Martin, and Lou Scheffer, editors, *Electronic Design Automation for Integrated Circuits Handbook*. CRC Press, Boca Raton, Florida, January 2006.
- [9] Stephen A. Edwards. Languages for embedded systems. In Richard Zurawski, editor, *The Embedded Systems Handbook*, pages 7–1–7–19. CRC Press, Boca Raton, Florida, January 2005.
- [10] Stephen A. Edwards. Languages for embedded systems. In Richard Zurawski, editor, *The Industrial Information Technology Handbook*, pages 85–1–85–18. CRC Press, Boca Raton, Florida, December 2004.

## Journal Papers

*All journal papers were peer-reviewed. The Proceedings of the IEEE papers were invited, as all papers in that journal are.*

- [11] John Hui and Stephen A. Edwards. [The sparse synchronous model on real hardware](#). *ACM Transactions on Embedded Computing Systems*, December 2022. Just Accepted.
- [12] Stephen A. Edwards, Richard Townsend, Martha Barker, and Martha A. Kim. Compositional dataflow circuits. *ACM Transactions on Embedded Computing Systems*, 18(1):5, February 2019.
- [13] Lisa Wu, Martha A. Kim, and Stephen A. Edwards. [Cache impacts of datatype acceleration](#). *Computer Architecture Letters*, 11(1):21–24, January 2012. Selected as one of the “Best Papers from Computer Architecture Letters” in 2011.
- [14] Nalini Vasudevan and Stephen A. Edwards. [Buffer sharing in rendezvous programs](#). *IEEE Transactions on Computer-Aided Design of Integrated Circuits and Systems*, 29(10):1471–1480, October 2010.

# Professional Activities

## Professional Society Memberships

Senior Member, IEEE	2006–
Member, ACM	2006–
Member, IEEE	1994–2006

## Standardization Committees

Vice Chair, IEEE P1778 Esterel Standardization Committee, 2007–2009

## Journal Activities

- IEEE Transactions on Computer Aided Design of Integrated Circuits and Systems  
*Top journal in my area.*  
Associate Editor 2006–  
Guest Editor, special section on the Intl. Workshop on Logic and Synthesis May 2006  
Reviewer 1994, 2001–2003, 2006–2009, 2013, 2017–2018, 2023
- ACM Transactions on Embedded Computer Systems  
Associate Editor 2008–  
Reviewer 2004, 2006–2007, 2009–2011, 2016–2018
- IEEE Transactions on Industrial Informatics  
Associate Editor 2007–  
Reviewer 2009
- EURASIP International Journal of Embedded Systems  
Associate Editor 2004–  
Reviewer 2007–2010
- IEEE Embedded Systems Letters  
Reviewer 2010–
- Real-Time Systems  
Reviewer 2010
- Science of Computer Programming  
Reviewer 2010–2011, 2018, 2019
- Journal of Systems Architecture  
Reviewer 2013
- Proceedings of the IEEE  
Reviewer 2015
- Computer Architecture Letters  
Reviewer 2019

**Conference/Workshop Activities**

- Design Automation Conference (DAC)  
*Top conference in my area; 15%-20% paper acceptance rate*  
 Technical Subcommittee Chair, *Managed four TPC members and 50+ papers.* 2006–2007, 2011  
 TPC Member, *Responsible for 30+ paper reviews per year.* 2004–2006, 2012, 2024  
 Reviewer 1996–2004, 2008–
- Design, Automation, and Test in Europe (DATE)  
*Second-to-top conference in my area.*  
 Topic Committee Member 2002–2004, 2007
- International Conference on Computer-Aided Design (ICCAD)  
*Third-to-top conference in my area.*  
 TPC Subcommittee Chair, *Invited to head new embedded systems software track* 2011
- International Workshop on Logic and Synthesis (IWLS)  
*Main workshop for logic synthesis, approx. 100 attendees*  
 Program Chair 2006  
 General Chair 2005  
 Publicity and Publications Chair 2003–2004  
 TPC Member 2003–2009, 2011–2012, 2015, 2017, 2018
- Embedded Systems Week  
 Local Arrangements Chair 2005  
 Publicity Chair (EMSOFT conference) 2003–2004  
 TPC Member (EMSOFT conference) 2004–2006, 2010, 2013, 2015, 2023  
 TPC Member (CODES+ISSS conference) 2008, 2009, 2010  
 Reviewer (EMSOFT conference) 2008, 2011, 2014, 2016
- Synchronous Languages, Applications, and Programming (SLAP)  
 Steering Committee Member 2006–  
 TPC Member 2002–2006
- Memocode conference  
 General Chair 2023–2024  
 Program Chair 2007–2008  
 Design Contest Chair 2012  
 Publicity Chair 2003–2004, 2006  
 TPC Member 2003–2007, 2009, 2011–2012, 2017–2022  
 Panel Organizer 2009
- Languages, Compilers, and Techniques for Embedded Systems (LCTES)  
 TPC Member 2006, 2010
- IEEE Real-Time and Embedded Technology and Applications Symposium (RTAS)  
 TPC Member 2005, 2006
- Forum on Specification & Design Languages (FDL) TPC Member 2016, 2017, 2023
- Embedded and Ubiquitous Computing (EUC)  
 TPC Member 2006–2008

- International Conference on Computer Design (ICCD)  
TPC Member 2004–2005
- Applications of Concurrency to System Design (ACSD)  
TPC Member 2004–2008
- Workshop on Modeling, Validation and Heterogeneity (MoVaH)  
TPC Member 2008
- ACM SIGPLAN Workshop on Partial Evaluation and Program Manipulation (PEPM)  
TPC Member 2008
- International Conference on Hybrid Systems: Computation and Control (HSCC)  
TPC Member 2008
- Language Descriptions Tools, Analysis (LDTA)  
TPC Member 2009
- International Conference on Software Language Engineering (SLE)  
TPC Member 2009, 2010
- Real-time Systems Symposium (RTSS)  
TPC Member 2009
- IEEE Intl. Conf. on Compilers, Architectures, and Synthesis of Embedded Systems (CASES)  
TPC Member 2013, 2014

### Grant Reviews

NSF: 2002, 2003, 2008, 2010, 2012 (2), 2014 (Panels).

INRIA (French National Research Agency): March 2016

ANR (French National Research Agency): October 2011, March 2013, May 2022.

DFG (German Excellence Initiative): January 2012.

Columbia Internal: 2022

### Paper Reviews

ACM Transactions on Programming Languages and Systems (TOPLAS) 2001

Computer-Aided Verification (CAV) 1996, 2001

Correct Hardware Design and Verification Methods (CHARME) 1999

### **Invited Talks**

#### *Keynotes*

Language Design is LEGO Design and Library Design. September 3, 2019  
 Presented at Forum on Specification and Design Languages. University of Southampton, UK.

Haskell to Hardware and Other Dreams. December 7, 2016  
 Presented at Synchron, Bamberg, Germany.

Functioning Hardware from Functional Specifications June 26, 2014  
 Presented at Applications of Concurrency to System Design (ASCSD), Tunis, Tunisia.

Compiling Parallel Algorithms to Memory Systems June 2, 2012  
 Presented at the 2012 Electronic System Level Synthesis Conf. (ESLsyn), San Francisco, California.

#### *Conferences/Other*

Ubiquitous Unix Units. October 22, 2019  
 Presented at Unix50. Nokia Bell Labs, Murray Hill, NJ.

- Net Booting/Installing Vintage Computers from a Raspberry Pi. May 3, 2019  
Presented at Vintage Computer Festival — East. Infoage Science Center, Wall, New Jersey.
- The Altair 8800 Computer: The Start of the Personal Computer Revolution. April 11, 2018  
Presented at the CSTA Central NJ Meeting, Princeton, New Jersey.
- Functioning Hardware from Functional Specifications November 18, 2014  
Presented at IBM Programming Languages Day, T. J. Watson Research Center, New York.
- Functioning Hardware from Functional Specifications July 22, 2014  
Presented at the DIMACS Workshop on Multicore and Cryptography, Hoboken, New Jersey.
- Functioning Hardware from Functional Specifications November 18, 2013  
Presented at the SYNCHRON workshop, Schloss Dagstuhl, Germany.
- Compiling Parallel Algorithms to Memory Systems May 29, 2012  
Presented at the Resource-Aware Functional Programming (RAWFP) Workshop, Göteborg, Sweden.
- From Recursive Functions to Real FPGAs March 4, 2012  
Presented at Compiling Complete Programs into Circuits (CCPC), London, UK.
- High-level Synthesis from Functional Languages October 19, 2012  
Presented at Synchronics Days, Paris, France.
- What Do We Do With  $10^{12}$  Transistors? The Case for Precision Timing February 21, 2008  
Presented at the DSRC TeraChip Workshop, Stanford, California.
- Verification Challenges in the SHIM Concurrent Language May 18, 2007  
Invited talk at the Third Northeast Verification Seminar, NEC, Princeton, New Jersey.
- Verification: What Works and What Does Not? May 18, 2007  
Panel at the Third Northeast Verification Seminar, NEC, Princeton, New Jersey.
- Using and Compiling Esterel July 11th, 2005  
Invited Tutorial, Memocode conference, Verona, Italy.
- The Future of Embedded Linux. June 30, 2005  
Panel at C3Expo, New York, NY.
- Languages for Embedded Systems August 2–6, 2004  
Week-long course at National Chiao Tung University, Hsinchu, Taiwan.
- Linux for EDA November 2003  
Tutorial at the International Conference on Computer-Aided Design (ICCAD), San Jose, California.
- High-Level Modeling and Validation Methodologies for Embedded Systems:  
Bridging the Productivity Gap January 4, 2003  
Presented at VLSI Design 2003, New Delhi, India.  
With Sandeep K. Shukla, Jean Pierre Talpin, and Rajesh K. Gupta.
- System-on-a-chip and the Coming Design Revolution November 1, 2002  
Invited talk at the Emerging Information Technology Conference (EITC), Princeton, New Jersey.
- Scaling the Abstraction Cliff: High-level Languages for System Design March 2001  
Tutorial A2 at the Design, Automation and Test in Europe (DATE 2001) Munich, Germany.

*Universities/Industry*

CPUs, GPUs, and the Rise of Software Parallelism Presented at Chalmers University, Göteborg, Sweden, as an introduction to Joel Svensson's PhD Defense.	December 16, 2013
Functioning Hardware from Functional Specifications Presented at Chalmers University, Göteborg, Sweden.	December 17, 2013
Compiling Parallel Algorithms to Memory Systems Presented to the PARKAS group, DI, École Normale Supérieure.	June 26, 2012
Compiling Parallel Algorithms to Memory Systems Presented at Jane Street, New York, NY	April 16, 2012

# Departmental

## Ph.D Students

Max Levatich	Fall 2020–
John Hui	Spring 2021–
Richard Townsend	Fall 2013–Spring 2019
Kuangya Zhai	Fall 2013–Spring 2016
Baolin Shao	Fall 2008–Fall 2010
Sungjun Kim	Spring 2008–Fall 2011
Kristina Chodorow	Fall 2007
Nalini Vasudevan	Spring 2007–Fall 2010
Marcio Buss	Spring 2004–Spring 2008
Jia Zeng	Fall 2002–Spring 2008
Cristian Soviani	Fall 2002–Fall 2007
Christopher L. Conway	Summer 2002–Spring 2006

## Postdoctoral Researcher

Olivier Tardieu	Spring 2005–Fall 2006
-----------------	-----------------------

## External PhD Committees

Adrien Guatto, École Normale Supérieure, Paris, France	January 2016
Joel Svensson, Chalmers University, Göteborg, Sweden	December 2013
Francesco Leonardi, University of Trento, Italy	March 2009
Jan Lukoschus, University of Kiel, Germany	July 2006
Matthieu Moy, Verimag, Grenoble, France	December 2005
Olivier Tardieu, Ecole des Mines, Sophia-Antipolis, France	October 2004
“Jacky” Dumitru Potop-Butucaru, Ecole des Mines, Sophia-Antipolis, France	November 2002
Sean Gibb, University of Calgary, Alberta, Canada	August 2002

## Internal Dissertation Defenses

Tom Repetti (Martha Kim)	February 2, 2023
Leon Wu (Gail Kaiser)	September 15, 2014
Richard Neil (Luca Carloni)	May 30th, 2013
Rebecca Collins (Luca Carloni)	November 23, 2010

Cheng-Hong Li (Luca Carloni)	July 22, 2009
Cheoljoo Jeong (Steve Nowick)	October 22, 2007
Cristian Soviani	August 30, 2007
Jia Zeng	August 30, 2007
Krysta Svore (Al Aho)	March 31, 2006
Saravanan Rajapandian (Ken Shepard, EE)	May 20, 2005
Tiberiu Chelcea (Steve Nowick)	December 8, 2003
Yu Zheng (Ken Shepard, EE)	June 9, 2003
Henry Li (Charles Zukowski, EE)	February 1, 2002
Michael Theobald (Steve Nowick)	December 18, 2001

### Internal Thesis Proposal Committees

Tom Repetti (Martha Kim)	January 5, 2021
Andrea Lottarini (Martha Kim)	December 5, 2017
Lisa Wu (Martha Kim)	Friday 22, 2013
Cheng-Hong Li (Luca Carloni)	December 3, 2007
Mark Eaddy (Al Aho)	December 13, 2006
Marcio Buss	April 27, 2006
Jia Zeng	May 2, 2006
Cristian Soviani	May 2, 2006
Krysta Svore (Al Aho)	March 31, 2006
Chris Conway	May 12, 2006

### Committees

Class Scheduling	Spring 2011–
<i>Scheduling all classes taught in the CS department</i>	
Ad hoc tenure committees	April, December 2013
PhD Committee	2003–
Academic Committee	2003–
Recruiting	
Hosted one candidate	2002
Hosted two candidates	2004
Hosted three candidates	2007
Hosted one candidate	2008
Hosted three candidates	2016
Hosted one lecturer candidate	2023

Visibility Committee  
*Revamped CS department web page*

2005

Space Committee  
*Assisted Steve Feiner with assigning students and faculty to offices*

2007–2013

## Teaching

In 2019, I developed a new course entitled **COMS W4995: Parallel Functional Programming** in which I teach students the Haskell functional language and in particular how to utilize its advanced support for efficient parallel computation.

Semester	F 2019	F 2020
Enrollment	54	39

Student comments:

“This school deserves to have and should have a functional programming course; within this institution, Stephen is single-handedly trying to create this representation. He really does care about getting people to understand a very different style of programming which should be better known and really is the opposite of the tendencies you would worry a Haskell class might exhibit.” (Fall 2019)

“I’m very glad that this course was taught this semester. Professor Edwards, as always, is a great instructor and explains hard concepts in a very lucid manner. I’m glad that Columbia offered an upper level course (outside of the classic OS, PLT etc courses) that’s not related to Intelligent Systems. Being a purely project based course in an esoteric programming language, this class exemplifies everything that a good CS course should be. I hope more classes that focus on core CS rather than catering to the current fad at the time (Intelligent Systems currently) are offered that equip students with a toolbox to tackle any set of problems.” (Fall 2019)

In 2014, I developed **CSEE W4840: Embedded System Design**—a new “capstone” lab course for Computer Engineering and Electrical Engineering majors. Seniors are required to take one of three such courses. In it, students design and implement embedded systems using state-of-the-art FPGA boards. Projects have included video games, music synthesizers, and robots. In 2017 and 2018, I did not teach 4840 because I was needed for 4115 both terms; I resumed in 2019.

Semester	Sp 2012	Sp 2014	Sp 2015	Sp 2016	Sp 2019	Sp 2020		
Enrollment	55	76	85	62	45	23		
Semester	Sp 2004	Sp 2005	Sp 2006	Sp 2007	Sp 2008	Sp 2009	Sp 2010	Sp 2011
Enrollment	57	45	40	34	25	28	23	37

Student comments:

“Professor Edwards is awesome! Second-best professor I’ve had at Columbia. And he’s only second best b/c professor Vallancourt is a god.” (Spring 2012)

“Stephen Edwards has very good teaching skills. He never misses an occasion to help students with their projects. He does not count his time. He is always really clear and go straight to the point. We clearly see that he knows what he is talking about. Excellent professor” (Spring 2012)

“Professor Edwards requires quite a bit from his students, but is always available and expends the necessary effort to show you what needs to be done to succeed. I’ve had him for two courses now, and find him to be a knowledgeable and thoughtful professor.” (Spring 2011)

“Stephen is well prepared during lectures and very helpful with projects. I wouldn’t want anything else from an Embedded Systems professor.” (Spring 2011)

“Prof. Edwards is an amazing teacher. I have always enjoyed his lectures.” (Spring 2007)

“His in class presentation is the best I have seen. He is approachable by students and always gives a straight answer to his students. Finally he takes an interest in what the student is doing though out the

course.” (Spring 2007)

“Professor Edwards is a very knowledgeable teacher who keeps the classroom interesting and moreover is very help in one-on-one lab settings. He has a genuine interest in what you are trying to accomplish and this is a first that I have seen among all Columbia professors during my 4 years here. To me he seems like the epitome of what a teacher should be.” (Spring 2006)

“I’ve always found Prof. Edwards to bring passion and energy to his lectures. He makes it easy to want to learn more.” (Spring 2006)

“For the time and effort he puts into his presentations and labs. Edwards and his TAs do almost as much work as the students.” (Spring 2005)

I also teach **COMS W4115: Programming Languages and Translators**, a senior/masters compilers class:

<b>Semester</b>	F 2016	Sp 2017	F 2017	F 2018	S 2021			
<b>Enrollment</b>	112	141	127	93	194			
<b>Semester</b>	F 2008	F 2010	F 2011	F 2012	F 2013	F 2014	F 2015	Sp 2016
<b>Enrollment</b>	64	61	70	105	86	90	125	83
<b>Semester</b>	Sp 2002	Sp 2003	F 2003	F 2004	F 2005	F 2006	Sp 2007	F 2007
<b>Enrollment</b>	107	86	58	52	59	55	58	68

Student comments:

“Professor Edwards has an amazing way in explaining both the broad concepts as well as in-depth details. His preparation for the course couldn’t have been better. Each homework was just in place (either prepared us for the mid-term, final or for starting the project) His presentation skills made one attentive throughout the lectures. He has an excellent way of delivery.” (Fall 2011)

“Professor Edwards was absolutely incredible and I almost failed.” (Fall 2006)

“Professor Edwards is the most accessible instructor I’ve ever had - and he teaches a class about compilers. He’s an amazing man.” (Fall 2006)

“His classes are extremely enjoyable the best course I have taken so far.” (Fall 2006)

“Of the four courses that I took this semester all had good professors but Stephen Edwards was outstanding in his delivery, his ability to use wit [made] his material interesting, and in the quality of the notes and management of the course. I would therefore give him my vote for the Distinguished Faculty award.” (Fall 2006)

“This is a course that I did not really want to take and have little aptitude for. Professor Edwards turned something which could have been very uninteresting into something lively and interesting—this is something I really appreciate.” (Fall 2006)

“Great professor made subject interesting and explained difficult concepts well. I felt like I even learned from the exams.” (Fall 2005)

“Now I know why people call [him] one of the best professors. His wit in the class just make everyone fall into the class.” (Fall 2005)

“Prof. Edwards is one of the few lecturers I’ve met who actually makes the classes very interesting. He’s always inserting funny anecdotes and ties in stories with concepts really well. It s been a pleasure to take PLT with him. Even outside the classroom Prof. Edwards is very friendly and fun to talk to. Would definitely be happy to see him get the SEAS Distinguished Faculty Award.” (Fall 2005)

“Edwards was a great lecturer a great motivator and created a great class. The class was so formative in my CS educational career that I would consider it the most valuable and one of the most interesting.” (Fall 2005)

“His demeanor inside and outside of the classroom is truly one of the greatest I have seen in my four years at Columbia. It is one of the few classes in the engineering school I look forward to going to everyday just to see what he’ll talk about next.” (Fall 2005)

“Prof. Edwards is a great lecturer and really knows his stuff. The class is really well organized.” (Fall 2004)

“One of the best and most useful classes I have ever taken in the CS department.” (Fall 2004)

“I really enjoyed the classroom delivery. The professor did a great job in explaining the concepts. I never felt lost in the material.” (Fall 2004)

In 2011, I developed the **Computer Science/Computer Engineering lab for ENGI E1102**, the new Gateway class. In it, I teach freshman engineering students how to reprogram an HP calculator to function in RPN. The students learn basic C programming, simple algorithms and data structures, and some low-level hardware.

Semester	F 2011	S 2012	F 2012
Enrollment	22	16	27

I teach **CSEE 3827: Fundamentals of Computer Systems**—an introductory digital design and computer architecture course required of all CS, CE, and EE students. \*Taught jointly with Martha Kim

Semester	F 2011	S 2012	F 2012
Enrollment	84	114*	74*

#### Student Comments:

“Professor Edwards is extremely knowledgeable, a great teacher, and very funny. He definitely made class more interesting. His questions were extremely fair although challenging as well.” (Spring 2012)

“I would definitely nominate Professor Edwards for a distinguished faculty award, as he made one of the less interesting subjects in computer science into quite the engaging course. I very much enjoyed his bringing in actual systems that had been developed, and used the components we were learning about in class. His walking us through their design really gave me an appreciation for the difficulties of making a complex computational system prior to the mid-80s.” (Spring 2012)

“Professor Edwards is one of the best professors that I have had at Columbia. He makes what could be a potentially impossible subject, approachable and easy. He is also hilarious, making lectures not only enjoyable at an academic level but also at a comedic one.” (Fall 2011)

“Really freaking good. Made concepts I didn’t understand in previous classes a lot clearer.” (Fall 2011)

“Prof. Edwards was extremely knowledgeable of the material. He made class interesting. His lectures were matched by thorough powerpoint presentations which were helpful in understanding the material. Prof was extremely helpful during office hours and after class in reviewing material and assignments. Great professor.” (Fall 2011)

“Professor Edwards works to teach in an understandable yet memorable way. He works to come up with new examples and analogies to drive points home, and he is helpful to the max. A groovy Professor, all around!” (Fall 2011)

**COMS W4995–02: Languages for Embedded System Design**

Graduate-level class of my own devising based on my book.

---

<b>Semester</b>	F 2001	F 2002
<b>Enrollment</b>	23	16

---

**Student Teaching**

University of California, Berkeley

1995

Head teaching assistant.

Supervised seven teaching assistants overseeing a 200-student upper-division logic design course (CS 150, taught by Richard Newton). Designed and wrote labs. Conducted weekly recitation section, gave substitute lectures to entire class, graded tests.

California Institute of Technology

1990–1992

Teaching assistant.

Wrote assignments and conducted a recitation section for the 30-student microprocessor design course (CS 51, 52, and 53). Designed sound I/O circuitry and PC board for class project.
