

Lab 1 Submission Guidelines

- Please fill in this shared [Google sheet](#) with your team membership. This should be done by next Wednesday (Sep. 18).
- **Only one submission is required for each team** and you should only submit after your team has been created on Coursework - so that one submission will be counted for all members. Your team should be created by TAs by Sep. 18 given that you have filled out the [Google sheet](#) on time.
- You should submit a `lab1_UNI1_UNI2.tar.gz` file which contains a folder named `lab1_UNI1_UNI2` and has the following structure (replace UNI with your actual UNI):
 - `lab1_UNI1_UNI2/`
 - `timed_out_and_back.py` : the main python script which starts the turtlebot controller
 - (Optional) other python files that `timed_out_and_back.py` depends on
 - `README.md` : a Markdown README file with the following sections:
 - Usage: how to run the main script. If you have other python files, you should describe their functionalities.
 - Method: a brief description of your methods
 - Video: a link to the Youtube video of a working demo of Lab 1
 - Others: anything else you would like to include
- **Violation of these submission instructions will result in point deduction.**

NOTE:

To create the `lab1_UNI1_UNI2.tar.gz` file from folder `lab1_UNI1_UNI2`, run the following command:

```
tar -zcvf lab1_UNI1_UNI2.tar.gz lab1_UNI1_UNI2
```
