

Class Projects: In class Presentations, April 30. Project Submission, May 7, 11:59 PM.

Project Demos can be scheduled through May 6-8.

Presentation: Each team will have an in-class presentation on April 30 (5 minutes to each team, can be a presentation by a single or multiple members of the team). Present your project to the class, including results so far (images/videos if relevant), implementation details, what you could do in the future if you had more time, and lessons learned.

Project Submission (What to hand in):

- A. Final submission date of projects will be Tuesday, May 7, 11:59 PM.
- B. For projects that involve code/algorithms, simulation, implementation etc. do the following. Create a zip file with the following files:
 - 1. A writeup describing the project, related previous work, implementation details, experiments and results (with images). Also describe division of labor among the team members.
 - 2. Any videos or other multimedia files
 - 3. Code files

Submit electronically to courseworks (we will give you details on this separately).

Project Demos: You need to schedule a time up until May 8 to demo the project with the TA's and myself. The TA's will post a signup schedule for demos the week of May 6-8.
