Response Rate 10/87 (11.49%)

- We already know that OS is supposed to be time-consuming, so I won't belabor that fact here. I wish Jae didn't set up his exams to be so stressful, where you knew that if you made one mistake you're guaranteed to lose a chunk of points, because you know he won't give partial credit. I also wonder why he doesn't allow students to use reading week to study (his final exam is on the second last day of class). The final week of class is usually very busy with final projects / homeworks due and I felt like having the exam on that week just imposes unnecessary additional stress.
- constantly late. expects us to complete the material that he didn't have time to deliver in class. sometimes answers questions in a condescending manner
- The exam is TOOOOOOOOOO hard!
- As any student who has taken this class would suggest, this should really be a four-credit class instead of three...
- Fundamental class, should be required
- Fantastic course all-around. Well put together. My only gripe is the logistics of group projects/grading. There were labs in which a partner did literally zero work, yet earned precisely the same grade I did. It was a bit infuriating.
- This was a phenomenal class. An incredible amount of work, but it was very rewarding. I feel like, after taking this class, I have vastly more intuition for how to solve certain problems, a good understanding of the linux kernel and operating systems in general, and much more fluency with C and large codebases. I'm very happy I took this class.
- Not as well organized as Advanced Programming, requires a lot of time, but definitely a class you learn a lot from.
- I feel like the courses pace was very irregular throughout the semester there narrow windows with high demand and wide windows with a light workload. This made the class hard to balance with other classes.
- The course is very worthwhile to learn applied systems knowledge however the workload is far beyond a typical 3 credit course. In comparison, AP is a 4 credit class with what seemed like roughly half of the workload. It feels unfair to put this much time into one 3 credit course.

Response Rate: 51/87 (58.62 %)

11 - If so, please explain why

Jae Lee

Response Rate 13/87 (14.94%)

- Jae is amazing
- I was so excited to take another class with Jae following AP, as I had experienced him being an enthusiastic and engaging lecturer. But in OS it quickly became clear that this class is not his passion and he would often just read off the slides and not engage nearly as much as he does in AP. The class was fine, but Jae has the ability to be an incredible lecturer when he tries and it just didn't feel like he really applied himself in that way.
- hes great
- Anyone: "Frozen 2 is good-" OS 2019 students: "What the fuck did you just fucking say about me, you little bitch? I'll have you know I graduated top of my class in the Navy Seals, and I've been involved in numerous secret raids on Al-Qaeda, and I have over 300 confirmed kills. I am trained in gorilla warfare and I'm the top sniper in the entire US armed forces. You are nothing to me but just another target. I will wipe you the fuck out with precision the likes of which has never been seen before on this Earth, mark my fucking words. You think you can get away with saying that shit to me over the Internet? Think again, fucker. As we speak I am contacting my secret network of spies across the USA and your IP is being traced right now so you better prepare for the storm, maggot. The storm that wipes out the pathetic little thing you call your life. You're fucking dead, kid. I can be anywhere, anytime, and I can kill you in over seven hundred ways, and that's just with my bare hands. Not only am I extensively trained in unarmed combat, but I have access to the entire arsenal of the United States Marine Corps and I will use it to its full extent to wipe your miserable ass off the face of the continent, you little shit. If only you could have known what unholy retribution your little "clever" comment was about to bring down upon you, maybe you would have held your fucking tongue. But you couldn't, you didn't, and now you're paying the price, you goddamn idiot. I will shit fury all over you and you will drown in it. You're fucking dead, kiddo."
- Clear explanation. He is Jae, after all! XD
- Jae is good.
- Jae's the best.
- Always late, badly written tests that test material that doesn't really matter.. Homeworks were great though
- If Jae were a religion, I would convert.
- Jae is great. He's won a bunch of teaching awards, and they're well deserved. He's a clear lecturer, prepares excellent slides and notes, and just has a knack for explaining concepts well and understanding and answering questions. He always has an illuminating answer to your question. He also structures his classes well with good projects and homeworks.
- I really appreciate Jae's open book approach to what he expects out of students in a course. This was true for AP, and it's true for this course as well.
- Frequently late
- Very good homeworks

<ul style="list-style-type: none"> Jennifer was great. Whenever I talked to her, she was well-prepared and knowledgeable and could help even with obscure questions about the internals of the linux OS. Great job.
