

Detecting Opinionated Claims in Online Discussions

Sara Rosenthal
Kathleen McKeown

COLUMBIA | ENGINEERING
The Fu Foundation School of Engineering and Applied Science

Definition

- Assertion by a speaker who is attempting to convince others that his opinion is true
- Claims that express an opinionated belief

This, as I said earlier, is a complex issue

Motivation

- Claims are common in social media
- Useful for identifying disputed claims
 - Claims that are not trustworthy
- Often a component of larger social acts
 - Argumentation: Claim followed by Justification
 - Agreement: Two claims agreeing on the same topic
 - Disagreement: Two claims disagreeing on the same topic

Belief vs Fact vs Request

- This, as I said earlier, is a complex issue .
- I have a job at Walmart.
- You say that “ ... for similar reasons I do not think the dead soldier is , either . ”
- Lots of articles get a few instances of vandalism a day .
- Would be good if you could say what those reasons are .

Belief vs Fact vs Request

- This, as I said earlier, is a complex issue .
- I have a job at Walmart.
- You say that “ ... for similar reasons I do not think the dead soldier is , either . ”
- Lots of articles get a few instances of vandalism a day .
- Would be good if you could say what those reasons are .

- Sentiment
- **Committed Belief**
 - System
 - Features
- Other Features
- Experiments
- Conclusion

Committed Belief

- Committed belief system detects speaker's expression about his own belief of statement truth
- Words in a sentence are tagged for belief
 - committed, e.g. I know
 - non-committed, e.g. I may
 - not applicable, e.g. I wish
- Lexical Features
 - POS, is-number, lemma
- Syntactic Features
 - is-predicate, root of parse

1. V. Prabhakaran, O. Rambow, and M. T. Diab, **Automatic committed belief tagging**, COLING, 2010
2. M. T. Diab, L. S. Levin, T. Mitamura, O. Rambow, V. Prabhakaran, and W. Guo, **Committed belief annotation and tagging**, in Linguistic Annotation Workshop, 2009

Committed Belief: Features

Some posts seem/B-CB to serve/B-NA no purpose but to make/B-NA people pissed/B-NA

- Compute frequency of the tagged belief words
 - e.g. seem, serve, make, pissed
- Apply feature selection using the Chi Square test in Weka

LiveJournal	Wikipedia
good	added
hard	agree
love	disagree
call	needs
comment	think
