

Postdoctoral Fellowship in Computer Vision and Machine Learning Columbia University in New York, NY

The Computer Vision Lab at Columbia University is hiring a Postdoctoral Fellow to join Prof. Carl Vondrick's research group.

The candidate should have a Ph.D. in computer science or related fields by the time they start and an excellent publication record in computer vision and machine learning, such as at CVPR or NeurIPS.

Located in Manhattan, our lab is situated in one of the most intellectually and artistically diverse communities in the world. Our students often win national awards for their research, who you will be able to co-advise.

The project will focus on self-supervised learning, and the postdoc will have substantial flexibility in setting their research agenda. The appointment is for two years with an option to renew for a third. The start date is flexible.

To apply, please contact Carl Vondrick at vondrick@cs.columbia.edu with your CV, email addresses for two references, and links to two of your publications.
