

Instructor: Rocco A. Servedio

Computer Science 4252: Introduction to Computational Learning Theory
Problem Set #0 (ungraded), Fall 2025

Due 11:59pm Tuesday, September 9, 2025

The first problem set is very easy: please go to [Courseworks](#) and visit the Ed Discussion board; this will be the best way to communicate with course staff and classmates about course material this semester.

(Mandatory) Write a short (few sentences) private post to the instructor telling me about your coursework background in CS theory, math, and machine learning.

(Not mandatory, but recommended) If you are comfortable doing so, write a short (few sentences) introductory public post to tell your classmates a little about you.
