▲□▶ ▲圖▶ ▲匡▶ ▲匡▶ 三臣 めんぐ

- Anonymity and privacy—and free speech
- Anonymity and privacy are often prerequisites for free speech!
- Plus: technology
- Anonymity and privacy: the Internet giveth and the Internet taketh away

Technology drivers

- Ubiquitous connectivity
- Ubiquitous computing
- Pocket supercomputers and tracking devices (AKA smartphones)
- Very cheap storage and processing
- Machine learning

Law and policy drivers

- drivers Privacy
 - Free speech
 - State action versus private action
 - Borders and international relations

Steven Bellovin Computer science professor; affiliate law faculty

Alex Abdo Knight First Amendment Institute; formerly ACLU National Security Project

CS students Mix of graduate and undergraduates; some pre-law or with other legal and policy interests

Law students Some with a technical background; some without

• None...

Steven M. Bellovin https://www.cs.columbia.ec COMS E6184, LAW L7777—Administrivia

- None...
- Well, not quite...

- None...
- Well, not quite...
- There are no specific computer science or legal prerequisites
- However, everyone is expected to learn something of the other's field
- Even in your own field, there are subtleties that turn out to be important in this context

- This is a seminar, not a lecture class
 - It will not be recorded; you are expected to attend live
 - This is an interactive class; if you just sit back and take notes, you won't get much out of it.
- You are going to do much of the talking
- Specifically:
 - We will speak for about half the time, maybe less, giving the major technical and legal concepts
 - We'll then discuss the material and the implications:
 - How does technology constrain what the law and policy can be?
 - How must technology change to accomodate legal or policy requirements?

- Generally, there will not be slides
- This is a seminar...

- Generally, there will not be slides
- This is a seminar...
- However, we will generally prepare notes for the day, which may or may not be in the form of slides

- We'll start each class with a few minutes discussing news items relevant to the class
- Come prepared to mention them!
- For really major news items, we may ignore the syllabus and discuss them instead

- Typically about 50 pages per week
- Most of it is primary source material, not a predigested text book
- You are expected to do the assigned reading before each class
- Yes, this is a graduate seminar...

- Class participation (20%)
 - Yes, we mean it about people particiapting...
- A group scoping paper (about 2000 words) on a topic of your choice (30%)
- A final paper (about 6000 words) on that topic (50%)
- In-class presentation of that paper, tentatively during the scheduled slot for the final.
- No exams, no required programming, though you may choose to do some programming for your project
- Note: percentages are approximate and *are* subject to change

The goal is to produce a publication-worthy paper. We hope (but do not require) that some of these papers will be submitted for publication.

- A group effort; mixed law students and CS students on each team
- You can form teams or half-teams
- We'll do the rest of the team creation
- Pick your own topic related to the course's themes—it may be a subject covered in class, but it need not be

Because this is a group project, we ask for a moral commitment not to drop the class—that would hurt your teammates

- A relatively short document describing what you plan to cover in your final paper
 - Also: what is not going to be covered
 - What resources do you need?
 - How will you obtain any necessary data?
 - What will each team member focus on?
 - What is the scope of the project?
- The primary purpose is for us to provide feedback on your approach and coverage
- You are "advised" to heed our advice...

- A substantive body of work
- Oral presentation during the slot allocated to the final
- (Note: the date may change if necessary to avoid conflict with the law school's finals schedule)
- May be aimed at either a CS or a Law venue—but must combine both subjects
- Properly formatted, with proper citations—Bluebook-style if intended for a law review
- Note to law students: because this is a group paper, it does not qualify as your major writing project.

- A form of proper attribution
- Where to go for more information
- Sometime a way to judge the credibility of the statement

- There is wisdom in the world not known to Google
- There are rooms and even whole buildings on this campus known as "libraries"
- The CU library network also has a lot of electronic works
- Often, you can get paywalled works for free via the library

- An oral presentation of the work during the slot assigned for the final
- Leave a bit of time for discussion
- Time to be set depending on the enrollment and number of teams

- Contrary to popular belief, Covid has not gone away
- We *strongly request* that you continue to wear a good mask during class, even if the mandate is abolished—this is a small room with many people
- Many people will contract Covid-19 or have a family member contract it
- If you have to quarantine, let us know—the class format is not great for Zoom, since there are no microphones around the room, but we can try
- If you experience any difficulties with this class due to pandemic-related issues, *please* contact us
- We'll do my best to help, understand, etc.
- We realize how little about this semester is normal

- If medical circumstances arise, see your dean
- We don't want or need to know the details
 - Especially for undergraduates, we're constrained in how merciful we can be without permisison from the dean's office
 - You're all adults; if there's a problem, it's up to you to take the initiative

- Email is by far the best way to reach us outside of office hours
- For email pertaining to this class, use smb+6184@cs...and alex.abdo@knightcolumbia.org
- There will be a class listserv—we'll use it and you should use it to share news items, etc.
- Bellovin
 If you need to see me and can't make it during my office hours, email me to set up an appointment
 - My office hours (and exceptions) are posted on my web page: https://www.cs.columbia.edu/~smb
 - Abdo By appointment—email for to schedule one

- Discussing assignments with others is encouraged—but all written material *must* be individual work unless otherwise instructed.
- Please use appropriate file permission mechanisms to protect your homework. (Looking at other people's work is forbidden.)
- Zero tolerance for cheating
- CS department academic honesty policy: http://www.cs.columbia.edu/education/honesty
- Law school academic honesty policy https://www.law.columbia.edu/community-life/student-life/current-llm-students/academic-integrity
- We will assume that you have all read it; you are in any event responsible for its terms and provisions.

Questions?
